

Spark::red Expands ATG Hosting Offering

SEATTLE, WA- December 17, 2007 - Spark::red LLC announced today that it will launch general availability of their ATG-specialized hosting solutions.

Spark::red has been providing hosting and technology services to an exclusive group of clients, including a Fortune-500 company.

"We made certain that we could respond to our clients' individual needs with the personal attention and quality that allows us to distinguish ourselves," said Russell Moore, spokesperson for Spark::red. "We have proven our capability, and are ready to expand our client base. ATG customers now have a premier hosting option, one that takes pride in delivery to the customer above all else."

About Spark::red LLC

Spark::red, a managed ATG hosting provider, focuses on providing a specialized hosting solution for ATG applications. The staff of experienced ATG architects allows Spark::red to deliver production environments in days, instead of weeks or months. With competitive pricing, a Tier 4 data center, and every staff member boasting over eight years of experience working with some of the largest ATG installations in the world, launching a new site or migrating an existing application will be quick, secure and painless. With Spark::red you will enjoy expert support, the fastest servers, and peace of mind. They invite you to contact them and discover the superiority of their ATG-specific hosting solution.
